Expert Statement 655 31941/4e* dated 18 December 2006

referring to Evidence of Performance 601 31941/4 dated 04 December 2006 Fogging test of inserts incorporated into the cavity width of insulating glass units

* Translation of Expert Statement 655 31941/4 dated 4 December 2006

Client

Pellini S.p.A.

Via Fusari, 19

26845 Codogno (Lo)

Italy

Basis

EN 1279-6: 2002-07; Glass in building - Insulating glass units - Part 6: Factory production control and periodic tests, Annex C, Fogging test Test report 601 31941/4 dated

Product	Insulating glass unit with shading device
Designation	ScreenLine ® SL20C
Overall dimensions (W x H)	350 mm x 500 mm
Configuration in mm	4 TSG / 20 / 4 TSG
Spacers	Aluminium, by Erbslöh
Building element in cavity width	Moving shading device with magnetic frontal control venetian blind clipper

*) based on Test Report 601 31941/4 and on the Manufacturer's Declaration with reference to the configuration of the materials used and the processing of the insulating glass units

requirements of DIN EN 1279-6, Annex C*)

Instructions for use

04 December 2006

The original test report is intended to demonstrate the fogging of inserts incorporated into the cavity width of insulating glass units.

Validity

The expert statement referring to demonstrate the fogging of inserts incorporated into the cavity width of insulating glass units does not allow any statement to be made on any further characteristics of the construction submitted regarding performance and quality.

Validity of the expert statement expires with expiry of any one of the above items referred to as basis (standards or test reports).

Notes on publication

The ift Guidance Sheet "Guidance on the use of ift test reports" applies.

The cover sheet can be used as an abstract
